Overview

For my project, I will make a Closet app; the goal is to help with the organization of one's wardrobe, which will be extremely helpful in my household of three daughters! They take way too much time in my opinion deciding what to wear and when to wear it, the hope for this app is that it allows us to save time and make outfit planning more efficient.

Stack

➔ MERN

Feature List

☐ View All Closets
☐ CRUD operation for Closets
☐ CRUD operation for Closet Items
☐ Create Outfit Function
☐ User Login/Reg

Latest Changes/Obstacles Overcome

➔ Incorporated scroll button onClick function for shirt/pant images on the Closet dashboard
➔ Much Empty
